## HOW TO APPLY LIPSENSE®

1. Apply to clean, dry lips. For a more defined look, line lips with LinerSense first.
2. With lips parted, place LipSense applicator on lip beginning at the outside corner and spread in a fluid, sweeping motion to the opposite corner of the lip without lifting the applicator (do not move applicator back and forth). Use three layers for long-lasting results.
3. Let each layer dry about five seconds before applying the next layer.
4. Finish your customized look (any three shades) with LipSense moisturizing glosses – to keep your color lasting and your lips moist and plump.
